TOURLO DEMO RESIDENCES, MUMBAI

Landing image brief

Everything needed to generate realistic exterior images for the new landing page in GPT Image 2: 16 images, the exact reference images to attach to each one, and a full prompt ready to paste.

What these images are for

1. **Hero:** the landing opens full screen on a realistic dusk render of the tower.
2. **Tower explorer:** the same render with floor outlines over the photo. Arrows rotate between 4 angles and the day/night button swaps to the daylight version of the same shot. Tapping a floor opens the existing floor, unit and 360 interior flow.
3. **Walk the site:** exterior 360 panos (plaza, lobby, podium, rooftop, aerial, station) linked with hotspots, leading into the apartment interiors.

The floor outlines are drawn from the 4 corners of each visible face, then split into 24 floors in code. The AI does not need to get the floor count exactly right, but every still must show the whole tower with nothing in front of it.

Reference images you will attach

FILE	WHAT IT IS FOR
REF_building.jpg	Your building reference render. Attach to almost every prompt.
hero_1_dusk.jpg	The first image you generate. Once approved it is the anchor for lighting, setting and style.
hero_1_day.jpg	Daylight anchor for the daytime panos and the balcony views.
hero_N_dusk.jpg	Each dusk angle is the source for its own daylight edit.
ext_plaza.jpg	Anchor for the lobby, so the view through the glass matches.
Current station pano	Composition reference only, for the Mumbai redo.

Rule of thumb: always attach REF_building.jpg, plus the most recent approved image of the same lighting (dusk or day). Name your files exactly as listed so they drop straight into the project.

Generation order

1. hero_1_dusk, then hero_1_day. Send these two to Claude first so the landing can be built while you make the rest.
2. hero_2, hero_3 and hero_4, each dusk first and then its daylight edit.
3. ext_plaza, then ext_lobby.
4. ext_podium, ext_rooftop, ext_aerial and ext_station.
5. balcony_view, then balcony_view_high.

Before you send each image, check

- Stills: the whole tower is visible from ground to crown, centred, with nothing covering the facade.
- Day versions line up with their dusk version when you flick between them (same framing, same building position).
- Panos: exact 2:1 ratio, horizon in the middle, no obvious mismatch where the left and right edges meet.
- The facade pattern and crown look like the same building in every image.
- No text, logos, watermarks or distorted people close to the camera.
- Reject and regenerate rather than fix by hand. Small seam or ground blur is fine: Claude will clean it up.

Sizes

- Stills: 16:9 landscape at the largest size available (the phone layout crops the centre, so keep the tower centred).
- Panos: exact 2:1 at the largest size available. Claude upscales to 4096 x 2048, smooths the edge seam, covers the stretched ground with a small Tourlo patch and makes the phone versions.
- Setting: every prompt uses the Mumbai setting. To switch to the European setting of your first pano, replace the sentence starting with "Setting:" in every prompt.

A Tower explorer stills

Landing background and floor selection. Make these first, in this order.

1 `hero_1_dusk.jpg`

Main corner view at blue hour. This becomes the consistency anchor for everything else.

Attach:

- REF_building.jpg (your building reference render)

PROMPT

The building is the tower shown in the attached building reference image: a slender square residential tower with 24 residential floors above a double height glazed lobby base. Exoskeleton facade of slim silver grey aluminium frames forming a staggered, irregular grid of tall rectangular openings, recessed floor to ceiling glass, deep balconies with green planters, and an open aluminium frame crown rising above the roof with rooftop greenery. The base has warm timber and brass interiors visible through tall glass. Keep the facade pattern, proportions and colours consistent with the reference, with a slightly simplified crown so the design is original. Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Blue hour, deep blue clear sky, warm golden light glowing from about half of the windows and from the lobby. Camera at street level about 120 m away, looking at a corner of the tower so two facades are visible, slight upward angle. The entire tower from the ground to the top of the crown is fully visible and centred, filling about 70 percent of the image height, with clear sky above. Nothing in front of the facade: no trees, poles, people or vehicles overlapping the tower. Plaza and landscaping only in the lower foreground. Photorealistic architectural visualisation, natural 35 mm lens, sharp detail, no text, no watermark. Landscape 16:9, highest resolution available.

2 `hero_1_day.jpg`

Same shot in daylight. Must be an edit of hero_1_dusk, not a fresh generation.

Attach:

- hero_1_dusk.jpg

PROMPT

Edit the attached image. Keep the camera, framing, building geometry, every facade detail and every object in exactly the same position. Change only the time of day to a clear, bright late morning: soft sunlight from the upper left, light blue sky with a few thin clouds, interior lights off, natural daylight shadows.

3 hero_2_dusk.jpg

Camera moved 90 degrees clockwise to the next corner.

Attach:

- REF_building.jpg (your building reference render)
- hero_1_dusk.jpg

PROMPT

The building is the tower shown in the attached building reference image: a slender square residential tower with 24 residential floors above a double height glazed lobby base. Exoskeleton facade of slim silver grey aluminium frames forming a staggered, irregular grid of tall rectangular openings, recessed floor to ceiling glass, deep balconies with green planters, and an open aluminium frame crown rising above the roof with rooftop greenery. The base has warm timber and brass interiors visible through tall glass. Keep the facade pattern, proportions and colours consistent with the reference, with a slightly simplified crown so the design is original. Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Blue hour, deep blue clear sky, warm golden light glowing from about half of the windows and from the lobby. Same tower, same lighting, same plaza style and the same camera distance, height and lens as the attached hero image, but the camera has moved 90 degrees clockwise around the tower, so it now looks at a different corner with two other facades visible. The entire tower from the ground to the top of the crown is fully visible and centred, filling about 70 percent of the image height, with clear sky above. Nothing in front of the facade: no trees, poles, people or vehicles overlapping the tower. Plaza and landscaping only in the lower foreground. Photorealistic architectural visualisation, natural 35 mm lens, sharp detail, no text, no watermark. Landscape 16:9, highest resolution available.

4 hero_2_day.jpg

Daylight edit of hero_2_dusk.

Attach:

- hero_2_dusk.jpg

PROMPT

Edit the attached image. Keep the camera, framing, building geometry, every facade detail and every object in exactly the same position. Change only the time of day to a clear, bright late morning: soft sunlight from the upper left, light blue sky with a few thin clouds, interior lights off, natural daylight shadows.

5 hero_3_dusk.jpg

Camera moved 180 degrees, the opposite corner.

Attach:

- REF_building.jpg (your building reference render)
- hero_1_dusk.jpg
- hero_2_dusk.jpg

PROMPT

The building is the tower shown in the attached building reference image: a slender square residential tower with 24 residential floors above a double height glazed lobby base. Exoskeleton facade of slim silver grey aluminium frames forming a staggered, irregular grid of tall rectangular openings, recessed floor to ceiling glass, deep balconies with green planters, and an open aluminium frame crown rising above the roof with rooftop greenery. The base has warm timber and brass interiors visible through tall glass. Keep the facade pattern, proportions and colours consistent with the reference, with a slightly simplified crown so the design is original. Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Blue hour, deep blue clear sky, warm golden light glowing from about half of the windows and from the lobby. Same tower, same lighting, same plaza style and the same camera distance, height and lens as the attached hero image, but the camera has moved 180 degrees clockwise around the tower, so it now looks at a different corner with two other facades visible. The entire tower from the ground to the top of the crown is fully visible and centred, filling about 70 percent of the image height, with clear sky above. Nothing in front of the facade: no trees, poles, people or vehicles overlapping the tower. Plaza and landscaping only in the lower foreground. Photorealistic architectural visualisation, natural 35 mm lens, sharp detail, no text, no watermark. Landscape 16:9, highest resolution available.

6 hero_3_day.jpg

Daylight edit of hero_3_dusk.

Attach:

- hero_3_dusk.jpg

PROMPT

Edit the attached image. Keep the camera, framing, building geometry, every facade detail and every object in exactly the same position. Change only the time of day to a clear, bright late morning: soft sunlight from the upper left, light blue sky with a few thin clouds, interior lights off, natural daylight shadows.

7 `hero_4_dusk.jpg`

Camera moved 270 degrees, the last corner.

Attach:

- REF_building.jpg (your building reference render)
- hero_1_dusk.jpg
- hero_3_dusk.jpg

PROMPT

The building is the tower shown in the attached building reference image: a slender square residential tower with 24 residential floors above a double height glazed lobby base. Exoskeleton facade of slim silver grey aluminium frames forming a staggered, irregular grid of tall rectangular openings, recessed floor to ceiling glass, deep balconies with green planters, and an open aluminium frame crown rising above the roof with rooftop greenery. The base has warm timber and brass interiors visible through tall glass. Keep the facade pattern, proportions and colours consistent with the reference, with a slightly simplified crown so the design is original. Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Blue hour, deep blue clear sky, warm golden light glowing from about half of the windows and from the lobby. Same tower, same lighting, same plaza style and the same camera distance, height and lens as the attached hero image, but the camera has moved 270 degrees clockwise around the tower, so it now looks at a different corner with two other facades visible. The entire tower from the ground to the top of the crown is fully visible and centred, filling about 70 percent of the image height, with clear sky above. Nothing in front of the facade: no trees, poles, people or vehicles overlapping the tower. Plaza and landscaping only in the lower foreground. Photorealistic architectural visualisation, natural 35 mm lens, sharp detail, no text, no watermark. Landscape 16:9, highest resolution available.

8 `hero_4_day.jpg`

Daylight edit of hero_4_dusk.

Attach:

- hero_4_dusk.jpg

PROMPT

Edit the attached image. Keep the camera, framing, building geometry, every facade detail and every object in exactly the same position. Change only the time of day to a clear, bright late morning: soft sunlight from the upper left, light blue sky with a few thin clouds, interior lights off, natural daylight shadows.

B Exterior 360 panos

The "Walk the site" tour. Each opens in the existing 360 viewer with hotspots between them.

9 ext_plaza.jpg

Arrival plaza and drop off in front of the lobby.

Attach:

- REF_building.jpg (your building reference render)
- hero_1_dusk.jpg

PROMPT

The building is the tower shown in the attached building reference image: a slender square residential tower with 24 residential floors above a double height glazed lobby base. Exoskeleton facade of slim silver grey aluminium frames forming a staggered, irregular grid of tall rectangular openings, recessed floor to ceiling glass, deep balconies with green planters, and an open aluminium frame crown rising above the roof with rooftop greenery. The base has warm timber and brass interiors visible through tall glass. Keep the facade pattern, proportions and colours consistent with the reference, with a slightly simplified crown so the design is original. Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Standing on the arrival plaza 15 m in front of the glazed lobby entrance, at blue hour, matching the lighting of the attached hero image. The tower rises directly ahead, the lobby glows warm, a covered drop off with one car parked, planters with tropical plants, wet stone paving with soft reflections. Behind the camera, the main street and the neighbourhood. Format: seamless 360 degree equirectangular panorama, exact 2:1 aspect ratio, highest resolution available. Level camera at 1.6 m eye height, horizon exactly at the vertical centre of the image, no tilt. The left and right edges must join seamlessly. The top edge is the sky directly overhead and the bottom edge is the ground directly below. Photorealistic architectural visualisation, no text, no watermark, no logos, no people within 5 m of the camera.

10 `ext_lobby.jpg`

Double height lobby inside.

Attach:

- REF_building.jpg (your building reference render)
- ext_plaza.jpg

PROMPT

The building is the tower shown in the attached building reference image: a slender square residential tower with 24 residential floors above a double height glazed lobby base. Exoskeleton facade of slim silver grey aluminium frames forming a staggered, irregular grid of tall rectangular openings, recessed floor to ceiling glass, deep balconies with green planters, and an open aluminium frame crown rising above the roof with rooftop greenery. The base has warm timber and brass interiors visible through tall glass. Keep the facade pattern, proportions and colours consistent with the reference, with a slightly simplified crown so the design is original. Inside the double height lobby of this tower in the evening. Warm timber wall panels, brass details, a stone reception desk, a lounge seating area, a sculptural pendant light, and tall glass walls looking out to the arrival plaza shown in the attached pano at blue hour. Calm and luxurious, consistent with the warm base of the reference tower. Format: seamless 360 degree equirectangular panorama, exact 2:1 aspect ratio, highest resolution available. Level camera at 1.6 m eye height, horizon exactly at the vertical centre of the image, no tilt. The left and right edges must join seamlessly. The top edge is the sky directly overhead and the bottom edge is the ground directly below. Photorealistic architectural visualisation, no text, no watermark, no logos, no people within 5 m of the camera.

11 `ext_podium.jpg`

Landscaped podium garden. Replaces the current garden panos, which do not match this tower.

Attach:

PROMPT

The building is the tower shown in the attached building reference image: a slender square residential tower with 24 residential floors above a double height glazed lobby base. Exoskeleton facade of slim silver grey aluminium frames forming a staggered, irregular grid of tall rectangular openings, recessed floor to ceiling glass, deep balconies with green planters, and an open aluminium frame crown rising above the roof with rooftop greenery. The base has warm timber and brass interiors visible through tall glass. Keep the facade pattern, proportions and colours consistent with the reference, with a slightly simplified crown so the design is original. Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Drone camera 80 m above the arrival plaza, level camera, horizon exactly at the vertical centre. Late afternoon. The tower stands close beside the camera. Below, the plaza, a metro line and main roads, and the surrounding district spreading in every direction, with clear roads leading away so landmarks can be labelled later. Seamless 360 degree equirectangular panorama, exact 2:1 aspect ratio, highest resolution available, left and right edges join seamlessly, photorealistic, no text, no watermark, no logos.

14 `ext_station.jpg`

Redo of your station pano in the Mumbai setting, so it matches the rest.

Attach:

- REF_building.jpg (your building reference render)
- hero_1_dusk.jpg
- your current station pano (as composition reference)

PROMPT

The building is the tower shown in the attached building reference image: a slender square residential tower with 24 residential floors above a double height glazed lobby base. Exoskeleton facade of slim silver grey aluminium frames forming a staggered, irregular grid of tall rectangular openings, recessed floor to ceiling glass, deep balconies with green planters, and an open aluminium frame crown rising above the roof with rooftop greenery. The base has warm timber and brass interiors visible through tall glass. Keep the facade pattern, proportions and colours consistent with the reference, with a slightly simplified crown so the design is original. Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Recreate the composition of the attached station panorama in Mumbai: standing on a metro platform at blue hour, rail tracks in front, a modern Mumbai Metro train arriving on the right, the tower rising across a plaza straight ahead, wet stone paving with warm reflections. Format: seamless 360 degree equirectangular panorama, exact 2:1 aspect ratio, highest resolution available. Level camera at 1.6 m eye height, horizon exactly at the vertical centre of the image, no tilt. The left and right edges must join seamlessly. The top edge is the sky directly overhead and the bottom edge is the ground directly below. Photorealistic architectural visualisation, no text, no watermark, no logos, no people within 5 m of the camera.

C Views from the balcony

Flat images. The first one switches on the "View from balcony" button that is already built.

15 `balcony_view.jpg`

City view from about floor 12 (Type A).

Attach:

- hero_1_day.jpg

PROMPT

Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Photorealistic view from a residential balcony on the 12th floor of this tower at golden hour, looking out over the district shown in the attached image. Slim silver aluminium frame and a glass balustrade at the edges of the foreground, greenery and the city beyond. Photorealistic architectural visualisation, natural 35 mm lens, sharp detail, no text, no watermark. Landscape 16:9, highest resolution available.

16 `balcony_view_high.jpg`

Higher view from about floor 22 (Type B sky villas).

Attach:

- hero_1_day.jpg
- balcony_view.jpg

PROMPT

Setting: an upscale new Mumbai business district similar to Bandra Kurla Complex. Rain trees, palms and tropical planting, clean stone paving, a few cars and auto rickshaws in the distance, no readable signage, text or logos. Photorealistic view from a sky villa terrace on the 22nd floor of this tower at golden hour, the same direction as the attached balcony view but much higher, with the sea and the city skyline on the horizon. Slim silver aluminium frame and a glass balustrade at the edges of the foreground. Photorealistic architectural visualisation, natural 35 mm lens, sharp detail, no text, no watermark. Landscape 16:9, highest resolution available.
